Re: Franklin County Courthouse Water Flow Test– Benton, IL

Premier Fire & Security Inc. proposes the following installation:

- Furnish labor to perform fire hydrant hydrostatic flow tests at two locations on the Benton Illinois Square as requested for the purpose of designing fire sprinkler system at the proposed Franklin County Court House.
- Upon completion of above flow tests, PFS will provide a report showing the following information:
 - Static pressure
 - Residual pressure
 - Hydrant water flow (GPM)
 - Map showing physical location of test hydrants

Notes:

- Premier Fire to perform the hydrant flow tests starting at 7:00 am during any regular business day, Due to heavy traffic on Rt 37 and limited parking around the square.
- Premier fire to have a representative of the water department present during the hydrant flow test. Due to the poor condition of the water line and hydrants.
- Premier Fire will perform the flow test with the upmost care for the hydrants and water lines but will not be responsible for any damage that may occur during or after the above flow test.
- Premier Fire will cease all flow test if any hydrant goes below 20-PSI per Illinois Department of Public Health.
- Above scope to be performed on a time and material basis.
- Others to permit work on a regular forty-hour workweek.
- Premier Fire & Security Inc. to receive prompt payment for work performed and material delivered.
- This proposal is contingent upon Contractor and Subcontractor agreeing to mutually acceptable contract terms. All terms included in this proposal shall survive the contract.
- Price valid for 30 days.

ESTIMATED COST \$500.00 Plus mileage.

Sincerely,

Bill Brown
Fire Sprinkler Division
